RIP Pro C6 Self Extracting Instruction

The extraction may take several minutes with. When it completes you may see the Finished message. Click OK to begin the installation. It may also go right to the installer automatically.

RIP Pro C6 Installation Instruction

Choose language.

Insert your Security Key now. Windows will recognize a new device. Windows will display this differently depending on the version of Windows you are running.

You may see Windows saying there is a problem with the device. This is Windows offering permission before communicating with an unknown device to Windows. You can choose Scan but you do not need to view the files on the dongle.

CADLINK (I:)	

Your CD drive should eject because windows thinks we want to look there first for the License file. You can cancel and close your CD drive. The License file is located on the actual security dongle. Choose the CADLINK device.

Note: Sometimes the security device may show up as Untitled or Mass Storage device. To verify remove the dongle and watch to see if the device disappears when you unplug it and reappears when you plug it back in.
