Create Queue Wizard	
Introduction	
Welcome to the production queue setup wizard.	
This wizard will set up your local production queue. A production queue manages your print and cut jobs for your configured printers and cutters.	
To continue, click 'Next', or click 'Cancel' to quit.	
< Back Next > Cance	-

Click NEXT to begin.

Create Queue Wizard	Install Printer
Printer Defaults	Select a printer from the list you want DTG RIP Pro v5 to support
Assign a default printer for this production queue.	Search: Clear
Select the default printer, print mode, and output port for this queue:	Select None Items selected: 1
Printer:	DTG HM1-C DTG Kiosk DTG Kiosk 2 DTG Viper
< Back Next > Cancel	OK Cancel

#### Click INSTALL PRINTER to begin.

Configure Printer
Device Package Search
Search for new device package versions from a CD and/or the Internet.
Search CD-ROM or floppy drive Insert your device packages CD
<ul> <li>Search dedicated Online server for updated device packages</li> <li>[Must have Internet access for this feature to work]</li> </ul>
O Don't search automatically, I will choose the search location
Choose this option if you want to select a device package from a specific location. This device package may not be the newest version available to configure.
Browse
< Back Next > Cancel

Choose your DTG Model from the list. Click OK.

Choose the option: Search for new device package versions from a CD and/or the Internet. Choose Search dedicated Online server for updated device packages.

You must have Internet access on this computer to install the most resent version of the printer package.

Click NEXT to continue.
